

STRATEGIC SOLVER

Your responses: More confident in Math, more than 10 hours per week, about 2 months

You'll need to be: *Committed, Persistent, and Strategic.*

The substantial amount of time you can **commit** to GRE prep each week will give you a decided advantage in being well-prepared for test day. Through **persistent** effort, you can reach far beyond your already strong foundational math skills and grasp more advanced concepts. Your study plan will help you **strategically** target the most frequently tested verbal concepts to maximize your score potential.

How to Use Your Study Plan: The study plan below is based on your answers to the survey. Each week, the Recommended items cover the strategies and content that will help you earn the most possible points on the GRE, so be sure to prioritize those items. To make your prep as efficient as possible, choose Optional items that best fit your study needs and schedule. If you fall behind or don't have at least 8 full weeks to study, be sure to prioritize the Recommended items. Happy prepping!

WEEKS 1-2

Format of the GRE

Knowing what to expect on each section of the GRE will give you confidence on test day—and throughout your prep. You'll know exactly what the GRE will ask you to do with the skills you are learning. Take a diagnostic practice test during these weeks; take the time to carefully review your results to get an idea of where you stand on each section of the test. This is also a good time to register for the GRE, if you haven't already done so, at ets.org/gre.

During these weeks, you'll:

- Become comfortable with the structure of each section of the GRE
- Learn how to grow your vocabulary for the Verbal sections of the GRE
- Begin your review of the math topics that the GRE tests
- Take a diagnostic practice test

WEEKS 6–7

Practice Test and Focused Practice and Review

You've worked hard and learned a lot over the previous weeks! Now, put that study to work on some authentic practice. Taking a practice test under test-like conditions is the best way to solidify what you've learned and to practice test-taking strategies. Plus, your results will help you make a plan for your remaining weeks until test day.

Tips for Taking Practice Tests:

Make the practice test count! Time yourself and try to make the practice test experience as much like the real thing as possible. Set aside several hours and find a place where you'll have no interruptions or distractions. Practice using the Kaplan Methods on every question—even if doing so takes more time now, practicing will improve your speed so the Methods are second nature on the real test day.

After finishing the practice test, it is vital that you *review your results*. Dig into each question—think not only about why you got a question correct or incorrect but also about whether you approached the question strategically. For each question, ask: What can I learn about this type of question?

After reviewing, use your test results to help you plan which chapters and online content to review until test day based on your individual study needs. You now know all the strategies and Kaplan Methods—it's time to solidify your skills by persistent practice.

During these weeks, you'll:

- Take a practice test
- Review the practice test
- Finish your review of math content and study of Quant question types
- Study your areas of opportunity as identified by your practice test results
- Practice, practice, practice questions of each type to continue solidifying your test-taking skills and content knowledge

WEEK 8

Final Practice Test and Strengths Focus

You've worked so hard! Only one week left, but you are well situated for success. Now things get kind of fun: take those topics you're awesome at and get more awesome at them before test day! Celebrate your successes and use this opportunity to get even better. You'll also take one last practice test about a week before your test date. As usual, take the time to dig into your results. Finally, do some light practice leading up to the big day.

During this week, you'll:

- Focus on your strongest topics to build confidence for test day
- Take a practice test, about a week before your scheduled test day
- Do light practice until test day
